SITE DETAILS

COUNTRY:	Australia
SITE:	Red Cross Blood Bank
APPLICATOR:	Uniseal
CONTRACTOR:	Buildcorp
YEAR:	2010
SIZE:	400 cubic metres

Figure 1: Main entrance

This Australian Red Cross Blood Service building has now become the primary blood manufacturing facility in Sydney.

John Harris of Uniseal, Radcrete's long time approved applicator, utilised RADMYX crystal growth admixture for the tank bases and sewerage of this \$115 million dollar project developed by Buildcorp.

RADMYX is a reliable waterproofing solution for structures subjected to hydrostatic pressure as well as preventing contamination and increasing durability.
