### SITE DETAILS

COUNTRY:	Romania
SITE:	Rosetti Business Centre
APPLICATOR:	UNICO PROFIT SRL
CONTRACTOR:	MEO Construct International
YEAR:	2010
AREA:	Basement

### RADMYX admixture for basement flooded by underground water.

Rosetti Business Centre is a modern serviced office complex situated in the sought after 2<sup>nd</sup> District in the heart of Bucharest.

RADMYX Capillary Waterproofing System was the chosen waterproofing material for the two underground levels of the structure as there is a significant ground water problem. The client wanted to ensure this was not going to be an issue into the future.

RADMYX was added to the concrete mix design prior to the concrete pour, during which 10 pumps had to be deployed to maintain underground water levels below the construction.
