

WATERPROOFING
CONCRETE FOR LIFE

RADCRETE

Woolworths Ulladulla car park waterproofed with Radmyx – maintenance free system!

SITE DETAILS

COUNTRY:	Australia
SITE:	Woolworths Ulladulla
CONTRACTOR:	ADCO
APPLICATOR:	Uniseal
TREATED AREA:	Post-tensioned roof top car park
SIZE:	2,500 cubic metres

Figure 1: The day of the pour

Another post tensioned rooftop car park slab and again Radmyx has been the product chosen to waterproof the concrete.

Woolworths were very proud to open this shopping centre in Ulladulla, which they did with the input of the local community and a carnival atmosphere. There was face painting, the school band, give-aways and officially opened by the Mayor!

Radmyx admixture fast tracks the construction schedule saving time and money. Complete waterproofing is normally achieved within 5-7 days of application. Radmyx remains dormant in the concrete and any subsequent contact with water will reactivate the Radmyx sealing process, giving the client a maintenance free system.

Figure 2: The adding of Radmyx at the batch plant
